

ZAPA Tag placement:

There are three types of ZAPA Tags:

1. Large Tags
2. Small thick Tags
3. Small thin Tags

1. Large tag

This tag can be placed anywhere on or inside any phone or on the vast majority of surfaces.

This tag can be placed inside metal backed phones on the battery.

Ideally, it should go inside the phone cover on the battery (if it fits)

Alternatively it can be placed on the outside of any phone.

Limitations:

Do not place this on any cards with mag-stripes or RFID e.g credit cards, swipe cards, electronic ID cards etc

2. Small thick tag

This tag can be placed anywhere on or inside the phone or the vast majority of surfaces.

Ideally, it should go inside the phone on the battery (except for metal backed phones)

It can be placed on the back of any phone (both metal & plastic)

Limitations:

Do **not** place INSIDE metal backed phones on battery

Do not place this on any cards with mag-stripes or RFID e.g credit cards, swipe cards, electronic ID cards etc

3. Small thin tag

This tag can be placed on the outside of plastic phones (or other non-metal surfaces)

Limitations:

Do not place on any metallic phone or metal surface

Do not place on the inside of any phone

Do not place this on any cards with mag-stripes or RFID e.g credit cards, swipe cards, electronic ID cards etc
